Subject: AUCTION OF CULLED BIRDS OF PARB PROJECT NO. 20-182

Dear Sir

It is submitted that after selection in F2 generation of birds of the PARB project No. 20-182 titled "*Development of Rohi Chicken for Cholistan*", about 300 birds are culled, based on their plumage pattern, growth performance, egg production, comb shape and other attributes. As these birds do not meet the selection criteria, so these are no more required for next project activities. It is therefore requested to grant permission for culling of these birds through public auction. The auction of culled birds will lower the burden of feed as well as medication of the birds rendered unproductive under the project.

It is submitted for your approval and permission to publish auction notice in newspaper, please.

allowed.
